FEDERAL JUDICIAL ACADEMY: AN INTRODUCTION

I. HISTORICAL PERSPECTIVE

A well-functioning, independent, and impartial judicial system is vital for securing socio-economic stability as it underpins the rule of law and inspires democratic values, security, and good governance. Efficacy in the justice system calls for efficient service delivery based on competence, integrity, and independence with a comprehensive approach. This means that the judicial sector, including all the stakeholders in the administration of justice, needs to be well-capacitated and professionally sound functionary at all levels. For this purpose, a mechanism for continued judicial education and respective capacity building becomes imperative to train all the players in the field of justice but predominantly the judges. This need, being felt and reflected in various law reform commission reports, finally led to the establishment of the Federal Judicial Academy in 1988, under a Resolution of the Government to provide judicial education and training for the relevant justice sector officers and staff.

In 1997, the Federal Judicial Academy was given legal cover under the Act of Parliament (Federal Judicial Academy Act, 1997). The Act regulated its functions and structure in line with its aims and objectives.

II. AIMS AND OBJECTIVES OF FEDERAL JUDICIAL ACADEMY

The Federal Judicial Academy (FJA) is a premier institution for conducting judicial education and training for all the stakeholders related to the administration of justice. Its primary objective is to provide comprehensive training to judges, magistrates, law officers, and court personnel to increase their professional competence leading towards not only their career progression but also towards enhanced quality of judicial dispensation. The institution is mainly concerned with the formulation and implementation of a continuing program of judicial education for pre-service and in-service training of judges. Nonetheless, the Federal Judicial Academy, inter alia, also caters to the needs of – (a) Legal Advisers and Draftsmen of various Ministries /Divisions/Departments including Judge Advocate General (JAG) Branches of Armed Forces, (b) Prosecutors /Attorneys/Solicitors, (c) Presiding Officers of Tribunals/ Commissions/Special Courts of Inquiry, (d) Members of the Bar (e) Police and Prison, (f) Court Support Staff, etc.

Besides training, the FJA is mandated by the Act to conduct conferences, seminars, workshops, and symposia for improving the judicial system and the quality of judicial work according to the growing needs and co-existent circumstances. This, by and large, empowers the Academy to craft and customize any knowledge-sharing module/ event on any contemporary legal issue or challenge. The Academy keeping this objective ahead conducts regular workshops/trainings/events on various specialized areas of law in non-traditional forms for the effective participation of all the stakeholders in the judicial process and to ensure a speedy administration of justice.

Another objective behind establishing FJA was to create a National Institute for Legal Research on contemporary legal issues and challenges in the administration of justice through the publication of journals, memoirs, research papers, and reports. Federal Judicial Academy through its Research and Publication Wing and Federal Law Journal provides a platform to all the justice sector stakeholders for expression of their ideas and brainstorming over coexistent legal challenges through encouraging and conducting research. With a rapid technological pace and the rise of ever-changing legal perplexities in our society, the challenges to the judiciary are multifold now. Therefore, a research frontier that looks into the grey areas of law is key to legal and institutional reforms, and would lead to the efficient

working of the judiciary – such aspects are welcomed and incorporated into the training modules, as well as into the Federal Law Journal.

Federal Judicial Academy takes pride in being the Federal Judicial Centre for standardizing, providing, and supervising the professional requirements of Judicial institutions and other judicial academies in the matters of capacity building, developing research culture, instruction manuals, audio/video materials, automatic data processing, system procedures, and other instructional and training material for improving judicial administration in the country. Veritably, with the new accredited training modules conducted for lawyers on professional mediation, FJA stands out and looks forward to being the Federal Centre for formalizing and regulating the standards and functions of Mediators and Conciliators as an adjunct of the judicial process, and for exploring the adoption of non-traditional court related modes for settling disputes.

III. VISION AND MISSION OF FEDERAL JUDICIAL ACADEMY

Our mission is to provide continuing judicial education based on research and skills, for enhanced competence and professionalism of key players in the justice sector.

and

An Institution of Excellence aimed at the continued professional development of an independent and accountable judiciary for expeditious and inexpensive justice that upholds the values in line with the aspirations of the people of Pakistan.

IV. CORE VALUES OF FEDERAL JUDICIAL ACADEMY

a) Integrity

Integrity is a core value of the Pakistan's judicial system, and it is something that we at Federal Judicial Academy hold very dear. Training programs at the Academy aim to raise awareness about integrity standards and corruption prevention in all matters related to judicial service. It includes various areas including codes of conduct and ethics, conflict of interest, ancillary activities, financial management rules and others.

b) Professional Ethics

The Federal Judicial Academy is committed to the development of professional ethics and professionalism in its participants. As a core value of the Academy, we believe that any officer who works toward a career in public service should be held to the highest standards of conduct and conduct appropriate for their position. We hold our trainees and staff to the highest ethical standards so that they can truly represent the people they serve.

c) Independence

Judicial independence has been established as the most important value taught by the Academy's faculty. This is because judges must be free from any external influences or pressure in order to make decisions, based on their understanding of the law and facts. Judicial independence counts the most as it prevents the courts from being used as a tool to advance any agendas other than fair administration of justice.

d) Quality

Federal Judicial Academy strives hard to provide high-quality services and training that meet the expectations and

requirements of the profession. Quality for us means maintaining rigorous standards for all of our work including curriculum of judicial education, faculty, training modes and modules, research work, and all other related matters. As such, faculty has been working diligently to update their teaching methods so that they can better understand the needs of current judicial officers who have varying backgrounds and experiences. This includes offering more hands-on learning opportunities which increases interest in classroom discussions. In addition, we are constantly looking for ways to improve our facilities and services so that we can continue to provide participants with an excellent educational environment.

e) Accountability

Accountability is a core value at the Federal Judicial Academy. The Academy strives to instill this value in all of its trainees, and it does so by training them to make decisions that are consistent with their commitment to accountability. It is what makes them accountable for their actions and decisions, and the outcomes of those actions.

f) Transparency

The Federal Judicial Academy puts a high emphasis on judicial transparency. We have strong policies regarding transparency of all matters of the Academy and try to inculcate the same in our judicial trainings. Specifically, this means transparent communication, being respectful of timelines and budgets, being up front when errors occur, and taking ownership of everything we do. We are always available to provide any information or assistance about our processes or trainings that might be helpful to our sister Academies or any other stakeholders related to administration of justice.

g) Consistency

Federal Judicial Academy regards the journey of education as a lifelong pursuit and hence has designed its training programs to ensure that the educational process at the academy is consistent and reliable over time.
